HARVESTING PERIOD

mid-November to mid-February

ACIDITY

0.30% - 0.60% max

REGION

The Mesara plain in Heraklion
(southern Crete)

EXTRA-VIRGIN OLIVE OIL

light, mellow extra-virgin olive oil. It is rich in vitamins A and E and has no cholesterol. We believe that our traditional products

should be subject to the same strict quality control as our organic products, which is why we have expanding our procedures to include chemical analysis in certified laboratories.

Enjoy Manoli extra-virgin olive oil as part of your daily diet with salad and other food. It is ideal for cooking, because it loses none of its valuable constituents at high temperatures (200°C).

PRINCE of CRETE

OUR DIAMOND!

Prora-Prince of Crete extra-virgin olive oil takes its name from the most famous symbol of the Minoan civilization.

It is cold-pressed at low temperatures in conditions of strict hygiene.

This, along with other procedures, makes it a high quality product with an excellent taste and aroma and all the valuable constituents of natural olive oil. Certified by Hellenic Chemical Laboratories.

PRINCESS of CRETE BIO

ENJOY ORGANIC!

Princess of Crete is an organic extra-virgin olive oil with no added chemicals. Under the strict supervision and quality control of Bio Hellas, we bring you a high quality organic product that is ideal for a healthy diet. We guarantee:

- Strict control of the harvesting period so that the olives are not overripe.
- Use of our own oil presses, extensive knowledge of the olive groves.

We bring our extensive knowledge and organisational infrastructure to every aspect of production, from harvesting to bottling, to ensure the finest possible end product.
